

IXL since 1858 | **Metal Castings**

Not sure what happens in a foundry?

Maybe you are interested in an engineering career?

Recently Logan W, who has an interest in engineering, had the opportunity to visit the foundry at IXL Metal Castings.

Thanks to the General Manager Sean who showed Logan around and gave him a very comprehensive tour of what is being manufactured at IXL. Now Logan has a much clearer understanding of the work being carried out by an engineer in a foundry.

IXL are very keen to support the career aspirations of any students interested in Engineering. See Mrs Boyanton or Mr Horsted if you are interested.
