

## “Gowns, gloves and glasses” for surprise visitors to Barwon Health Laboratory

Recently Paige and her workplace mentor Jason hosted two special visitors to the lab when our new Assistant Principal Mr McLeod and our new STEM Leader Mrs Needham came to visit.

All decked out in “gowns, gloves and glasses” they both enjoyed a tour of the lab and watched as Paige was assisting Jason with the regular servicing and replacement of filter cartridges for the laboratory water purification system, which operates on the same principle as large desalination plants that provide drinking water from sea water. Access to high purity water is essential to many of the operations within the research laboratory.

*Thanks for the visit Mr McLeod and Mrs Needham.*
