

Year 9 Workplace Visits

Recently all Year 9 students travelled into the Geelong CBD and visited a number of our

P-TECH industry partners with a view to hearing about the different job roles people work in and also to see these organisations in their day to day operation.

Hopefully this opportunity has provided students with some ideas for their future pathway and assist with course selection for 2020.

Year 9 students had the opportunity to visit the real world of work recently. Thanks to our P-TECH partner and industry mentor Jason from Barwon Health our students had the opportunity to visit the Geelong Centre for Emerging Infectious Diseases laboratory located at University Hospital.

Students in Year 10 or 11 who elect to study a Certificate III in Laboratory Skills would have the opportunity of working in a laboratory with an industry mentor like Jason.

All thanks to the network of P-TECH industry who support Newcomb Secondary College.
