

## P-TECH Is Back And Ready To Go In 2019

Firstly - Congratulations to all the students who completed their two year Certificates at the end of last year. As our P-TECH student Jack Terrill said at a meeting last year "this is a great qualification to have in my back pocket" as I move forward with my future career.

In 2019 P-TECH will have a brand new stream of study with a Certificate II in Automotive (Motor Mechanics) being offered. Two lucky Year 10 students will commence their work placements at Blood Toyota. Other Year 10 students will be in Laboratory Skills, IT and Business placements with our P-TECH partners.

This week Denver T commenced his work placement with his mentors Nathan and Steve at the Royal Geelong Yacht Club (RGYC). As part of his induction he did a tour of the facilities, heard all about the multi million dollar building project about to commence and was presented with his RGYC T-Shirt, ID card and lanyard ready to start. He will study a Certificate III in Business over the next two years at the Gordon.

*Thank you to Phil C, Nathan B and Steve H from the RGYC for your continued support of the P-TECH Program.*
