

Biomed at University Hospital Geelong

Care | Education | Research

Are you interested in studying
Certificate III in Engineering (mechanical)?

Have a chat with Mr Horsted or Mrs Boyanton - there might be an opportunity to have some work experience to see if you might like mechanical engineering as your future career path.

Ethan is currently in a regular work placement with the Biomed team located at University Hospital. He is learning how to maintain all the medical equipment at the hospital.

Thanks to Tung and his team at Barwon Health for supporting our P-TECH Program.
