

## Certificate III Laboratory Skills

All of this happened in the first visit to Barwon Health lab...

P-TECH student Paige has just commenced studying a Certificate III in Laboratory Skills at the Gordon. As part of the P-TECH Program Paige will work with her industry mentor Jason on a fortnightly basis at the Geelong Centre for Emerging Infectious Diseases laboratory, located at University Hospital.

Today she learnt to use liquid-handling pipettes to precisely measure microliter volumes, performed serial dilutions of food dye and successfully analysed optical density of the samples using an absorbance plate reader, all in one day!

Thanks Barwon Health and Jason for your ongoing support of the P-TECH Program.
